

## PURPOSE:

1. By using the high effect of 3-dimensional hi-frequency vibration vertex the work-pieces could be grinded and polished to a glossy surface finishing while the grand stone and work-pieces to move in the spiral rolling flow.
2. This machine succeeds in the surface finishing polishing of stainless steels. Ferrous steels, cast iron, non-ferrous metals. Such as aluminum, copper, brass, zinc, alloys and porcelain, jadestones, corals, synthetic resins, plastic, bamboo, wood, etc..
3. This kind of machine is suitable for any shape or delicate parts, due to having Polyurethane-Liner for long life.
4. The vibratory motor conforms to international standard.
